PREFACE

The *2004 Named Freeways, Highways, Structures and Other Appurtenances in California* publication provides information concerning the officially Named Freeways, Highways, Blue Star Memorial Highways, Highway Structures, Safety Roadside Rests, and Plaques on the California Highway Systems.

The California highway and freeway system was first built in Los Angeles area. The freeways in Los Angeles started as spokes radiating outward from the Civic Center. The name of the freeway became the name of the freeway's destination place name. Examples of freeways named for their destination are the Harbor, Santa Ana, Santa Monica, Pasadena, Hollywood, Ventura, and San Bernardino freeways.

Freeway names originate from four different sources: the Legislature, the Highway Commission, local jurisdictions, or through historical use. Many freeways that were not named by official action acquired their names through local usage and location. Examples of names coming from local usage are the Eastshore and Foothill freeways. A separate section relating to historical usage names is included in this document.

Each Legislative session produces a number of Senate and Assembly resolutions proposing to name state highway segments or structures in honor of some individual, group or historical event. Over the years, an informal or ad hoc policy developed relative to the criteria for approval of such designations and memorials. In the past, no firm Legislative guidelines existed, which in some instances, resulted in inconsistency or controversy over a proposed designation.

Legislative Chaptered bills referenced to as "Ch" are Resolution Chapters and are not Statue Chapters. Chaptered bills are summarized in an annual publication available in the CALTRANS Legal Library. House and Senate Resolutions referenced to as "HR" and "SR" are the official document of the corresponding Legislative body for naming roads, bridges, historic places, etc.

Unlike a Legislative bill, the Department is not required to comply with Legislative Resolutions. The Resolutions are only printed in the Daily Journal of each respective body; therefore, the actual date of passage must be known for research in the Secretary of State Archives – Bill Room - 1025 "O" Street, Sacramento. Example: SR 138-1949 would be found in the Senate Daily Journal dated July 2, 1949. Any recording of a single Code Resolution must always include the date of action.

In the 2004 Legislative session, the Transportation Committee established a set of guidelines for naming highways and structures.

The following guidelines provide criteria for the eligibility of Legislative consideration of a naming resolution for a highway or structure. The guidelines also serve the Committee's efficient consideration of such proposals. Adherence to the guidelines promotes fairness in determining whether a particular facility or segment is to be specially designated.

Committee Policy on Resolutions for Naming Highways or Structures

Recommended Policy:

Regarding resolutions introduced on or after April 26, 2004, the Committee will consider only those resolutions proposing to name or designate state highways or highway structures which meet specific minimum criteria. The criteria shall include the following conditions:

- a) Any person being honored must have provided extraordinary public service or some exemplary contribution to the public good and have a connection to the community where the highway is located;
- b) The naming must be done without cost to the state: costs for signs and plaques must be paid by local or private sources and there must be a small additional amount, as determined by Caltrans but not to exceed 10% of the installation cost, donated to cover ongoing maintenance costs;
- c) The author or co-author of the resolution must represent the district in which the facility is located and the resolution must identify the specific highway segment or structure being named;
- d) The proposed designation must reflect a community consensus;
- e) The proposed designation may not supercede an existing designation unless the sponsor can document that a good faith effort has uncovered no opposition to rescinding the prior designation; and
- f) When a resolution names a highway or structure in honor of an individual, the designee must have been deceased for at least 18 months, except in the instance of elected officials, in which case they must be out of office.
